|  | Vulnerable<br>Structures | None     | None   | None  | Light    | Moderate | Mod./Heavy  | Heavy      | V. Heavy | V. Heavy |

<sup>\*</sup>Estimated exposure only includes population within the map area.

#### Population Exposure

#### **Structures**

Overall, the population in this region resides in structures that are a mix of vulnerable and earthquake resistant construction. The predominant vulnerable building types are informal (metal, timber, GI etc.) and unreinforced brick masonry construction.

#### **Historical Earthquakes**

| Date       | Dist. | Mag. | Max        | Shaking |
|------------|-------|------|------------|---------|
| (UTC)      | (km)  |      | MMI(#)     | Deaths  |
| 1985-05-10 | 173   | 7.2  | VII(28k)   | 1       |
| 2000-11-16 | 140   | 8.0  | VIII(131k) | 1       |
| 1983-12-21 | 185   | 6.2  | VII(5k)    | 10      |

Recent earthquakes in this area have caused secondary hazards such as landslides that might have contributed to losses.

#### **Selected City Exposure**

from GeoNames.org

| MMI | City    | Population |
|-----|---------|------------|
| III | Rabaul  | 8k         |
| Ш   | Kavieng | 14k        |
| Ш   | Kimbe   | 19k        |
| Ш   | Kokopo  | 26k        |

bold cities appear on map.

(k = x1000)

PAGER content is automatically generated, and only considers losses due to structural damage. Limitations of input data, shaking estimates, and loss models may add uncertainty.
